	Honda Canada Finance Inc.	1987	Markham, Ontario	Wholesale financing to Honda/Acura automobile, motorcycle and power equipment dealers; retail financing for Honda/Acura automobiles.
	Honda Trading Canada	1990	Alliston, Ontario	Export and import activities.
Mexico	Honda de Mexico S.A. de C.V.	1985	Mexico City, Estado de Jalisco	Sales, import, manufacture and distribution of Honda products and service parts, sales, marketing, research and development.

* Effective April 1, 2021, Honda's Powersports R&D and manufacturing operations are now part of American Honda Motor Co., Inc., and the Powersports Division is headquartered in Alpharetta, Ga. Production of Honda powersports remains at Honda South Carolina Manufacturing in Timmonsville, S.C. Effective April 1, 2022, Honda's Power Equipment R&D and manufacturing operations are now part of American Honda Motor Co., Inc. The Power Equipment Division continues to be based in Alpharetta, Ga., and production of Honda power equipment products remains at Honda North Carolina Manufacturing in Swepsonville, N.C.

** NOTE: Effective April 1, 2021 all of Honda's auto manufacturing facilities in the U.S. and auto product development operations were unified into a single company — Honda Development & Manufacturing of America, LLC. The production facilities remain in operation in their original locations, but are no longer listed as individual companies.

North America Sales

North America Manufacturing

U.S. Manufacturing Facilities

Honda Development & Manufacturing of America

NOTE: Effective April 1, 2021 all of Honda's auto manufacturing facilities in the U.S. were unified into a single company — Honda Development & Manufacturing of America, LLC. The production facilities remain in operation in their original locations.

NOTE: Honda is investing \$700 million to retool several of its existing auto and powertrain plants to establish a new EV Hub in Ohio, to prepare for the production* of battery electric vehicles starting in 2025. Honda will transform the Marysville Auto Plant, East Liberty Auto Plant, and Anna Engine Plant, leading to the start of EV production in North America. MAP will be Honda's first auto plant in the U.S. to transition to making EVs. Also, part of the new EV Hub, Honda and LG Energy Solution have committed to invest \$3.5 billion to construct a new joint venture EV battery plant in Ohio, scheduled to be completed by the end of 2024. The overall investment of the two companies in the JV facility is projected to reach \$4.4 billion.

Region	Facility / Location	Models Produced		Began Production	Plant Size	Annual Capacity	Employment	Investment
United States	Marysville Auto Plant Marysville, Ohio	Accord Accord hybrid	Acura TLX Acura TLX Type S Acura Integra Integra Type S	Nov. 1982	4.4 million sq. ft.	440,000 vehicles	4,700	\$5.4 billion
	Honda's Marysville Auto Plant (MAP) produces both Honda and Acura vehicles including the Honda Accord and Accord hybrid, Acura TLX and Integra as well as its Type S variants. MAP is the first U.S. auto plant established by a Japanese automaker and has been building Honda vehicles for over 40 years, since beginning production of Accord on November 1, 1982. MAP has the largest vehicle production capacity of any Honda auto plant in the U.S. and has produced more than 14.6 million vehicles through 2022, including more than 12.5 million Accords. MAP also builds the Accord hybrid, including sub-assembly of the IPU hybrid battery unit, as Honda advances the production of electrified vehicles in North America. The plant is the exclusive global production facility for the Acura Integra, the 2023 North American Car of the Year. MAP will be part of the new EV Hub being established in Ohio to lead the company's production of EVs in North America. Production of EVs using Honda e:Architecture will begin in Ohio in 2025. MAP earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.							
	East Liberty Auto Plant East Liberty, Ohio	CR-V CR-V hybrid	Acura RDX Acura MDX	Dec. 1989	2.6 million sq. ft.	240,000 vehicles	3,100	\$1.9 billion
		Honda's second U.S. auto production facility, the East Liberty Plant (ELP) builds crossover and SUV models, including CR-V and CR-V hybrid and is the exclusive global production facility for the Acura RDX and MDX. ELP has produced over 6.6 million vehicles since opening in 1989. Although it began production with the Honda Civic, ELP defined flexible manufacturing in 2002 when it performed a first by building light trucks and cars on the same line. ELP will be part of the new EV Hub being established in Ohio to lead the company's production of EVs in North America. Production of EVs using Honda e:Architecture will begin in Ohio in 2025. ELP earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.						
	Performance Manufacturing Center Marysville, Ohio	Acura PMC Edition Models CR-V Fuel Cell Vehicle (in 2024)		April 2016	212,000 sq. ft.	Build to order	100	\$70 million
		The Performance Manufacturing Center (PMC) was conceived as a small volume, specialty manufacturing facility, focused on craftsmanship and hand-assembled vehicles. Starting in 2024, PMC will produce an all-new hydrogen fuel cell electric vehicle (FCEV) based on the recently launched, all-new Honda CR-V. PMC opened in 2016 as the exclusive global manufacturing facility for the Acura NSX supercar and is structured around an innovative blend of human craftsmanship and advanced technology. The PMC ushered in new approaches to vehicle construction, paint, assembly and quality confirmation to represent a pinnacle expression of the Acura brand DNA of Precision Crafted Performance. In 2019, the PMC added production of Acura PMC Edition vehicles as an extension of its unique capabilities at small-batch production. This has included the Acura TLX, MDX and RDX PMC Editions. In 2022, PMC earned the U.S. Environmental Protection Agency ENERGY STAR Certification and the plant is a virtually zero-waste-to-landfill facility.						

*Note: Honda and Acura products are made using domestic and globally sourced parts.

Region	Facility / Location	Models Produced		Began Production	Plant Size	Annual Capacity	Employment	Investment
United States	Anna Engine Plant Anna, Ohio	4-Cylinder Engines V-6 Engines Turbo Engines CVT Pulleys Engine components		July 1985	2.8 million sq. ft.	1,180,000 engines	2,900	\$2.9 billion
	Honda’s largest auto engine plant in the world, the Anna Engine Plant (AEP) produces* V6 and inline 4-cylinder engines, including 1.5, 2.0 and 3.0-liter turbo engines, and various engine components for Honda plants around the world. AEP also produces the 2.0-liter VTEC® Turbo for the high performance Civic Type R. In 2021, ELP began production of the all-new 3.0-liter turbo V6 engine for the TLX Type S as part of a \$200 million plant expansion. AEP will be part of the new EV Hub in Ohio, producing battery casings to be combined with the EV batteries produced at the new Honda-LGES joint venture EV battery plant now under construction in Ohio. These EV batteries will power the EVs to be produced at MAP and ELP. AEP earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.							
	Alabama Auto Plant Lincoln, Alabama	Pilot Passport Odyssey	Ridgeline TrailSport Models V-6 engines	Nov. 2001	4.9 million sq. ft.	340,000 vehicles 340,000 engines	4,500	\$3 billion
	The Alabama Auto Plant (AAP) has been in operation for over 20 years and today is the exclusive global production source of four Honda light trucks, including the Odyssey minivan, the Pilot and Passport sport utility vehicles and the Ridgeline pickup truck, as well as all Honda TrailSport editions, the next chapter in Honda’s rugged light truck direction. The plant also produces the V6 engines that power each vehicle. The facility was the first automobile plant in North America to operate as a zero-waste-to-landfill facility, leading the way for reduced waste from vehicle production activities at all of Honda’s plants in North America.							
	Indiana Auto Plant Greensburg, Indiana	Civic Hatchback CR-V CR-V hybrid		Oct. 2008	2.5 million sq. ft.	250,000 vehicles	2,700	\$1.3 billion
	Honda’s Indiana Auto Plant (IAP), began production of Civic sedans in October 2008. In September 2021, IAP began production of the Civic Hatchback following a \$50.2 million investment to prepare the plant for mass production of the Civic Hatchback for the first time in the U.S. In 2022, IAP began production of the all-new Honda CR-V, including CR-V hybrid trims. IAP earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification. AAP continues to operate as a zero-waste-to-landfill facility today.							

*Note: Honda and Acura products are made using domestic and globally sourced parts.

North America Manufacturing

U.S. Manufacturing Facilities

Honda Development & Manufacturing of America (Continued)

NOTE: Effective April 1, 2021 all of Honda's auto manufacturing facilities in the U.S. were unified into a single company — Honda Development & Manufacturing of America, LLC. The production facilities remain in operation in their original locations.

Region	Facility / Location	Models Produced	Began Production	Plant Size	Annual Capacity	Employment	Investment
United States	Georgia Transmission Plant Tallapoosa, Georgia	Automatic Transmissions	May 2006	514,000 sq. ft.	375,000 V-6 automatic transmissions	470	\$485 million
	Honda’s Transmission Plant in Georgia produces* state-of-the-art 10-speed automatic transmissions, applied to the Honda Pilot, Odyssey and Accord and the Acura RDX, TLX and MDX. The plant opened in 2006 with the assembly of automatic transmissions for North American-built models. The plant added the casting and machining of transmission cases to its initial assembly operations in 2007, expanding plant size from 100,000 to 515,000 sq. ft. and increasing capital investment from \$100 million to \$440 million. In 2017, Honda invested an additional \$100 million for the new assembly line and other modifications to support the current production line. The Honda Transmission Plant in Georgia earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification. This state-of-the-art plant is a zero-to-waste-landfill facility.						
	Ohio Transmission Plant Russells Point, Ohio	Automatic Transmissions Two-motor hybrid systems Super Handling All-wheel Drive™ (SH-AWD®) systems	July 1996	1.1 million sq. ft.	1 million transmissions CVT and HEV 198,000 hybrid power systems 1.5 million gear sets 290,000 4WD diffs 300,000 4WD transfer cases	1,100	\$1.1 billion
	The Honda Transmission Plant in Ohio produces continuously variable transmissions (CVT), the two-motor hybrid system that helps power the Honda Accord hybrid and CR-V hybrid trims, as well as the rear differentials found in all-wheel drive systems, including SH-AWD (Acura vehicles) and i-VTM4 (Honda light trucks). The plant began producing automatic transmissions for North American-built models in 1996. Previously (1989-96), Honda had produced automatic transmissions for U.S.-built vehicles at the Anna Engine Plant. The Ohio Transmission Plant was the first auto transmission plant in the U.S. to obtain a substantial amount of its electricity directly from two wind turbines located on its property (2014). In 2019, it became the first U.S. auto transmission plant to earn the Environmental Protection Agency’s ENERGY STAR Certification, and the plant earned it in 2022. This state-of-the-art plant is a zero-to-waste-landfill facility.						

*Note: Honda and Acura products are made using domestic and globally sourced parts.

North America Manufacturing

U.S. Manufacturing Facilities

Region	Facility / Location	Models Produced		Began Production	Plant Size	Annual Capacity	Employment	Investment
United States	South Carolina Manufacturing Timmonsville, South Carolina	Four Trax ATVs Pioneer Side x Sides	Talon Side x Sides	July 1998	844,600 sq. ft.	100,000 ATVs 100,000 Side x Sides	1,000	\$450 million
	South Carolina Manufacturing is the exclusive global production* home of Honda side-by-side (SxS) vehicles, including the Honda Pioneer series and Talon sports models. Honda began production of all-terrain vehicles (ATVs) at South Carolina Manufacturing in 1998, Honda's second power sports production facility in America. The plant began production of the Pioneer line of side-by-sides in June 2013. In 2016, South Carolina Manufacturing announced a \$45 million plant expansion to enhance operations and support the expansion of SxS production to meet customer demand. Production of the Honda Talon 1000X and 1000R sport side-by-sides began in 2019. To enable South Carolina Manufacturing to further expand SxS production to growing meet customer demand, in 2023, ATV production was transferred to North Carolina Manufacturing. South Carolina Manufacturing earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification..							
	North Carolina Manufacturing Sweepsonville, North Carolina	Snow blowers Four Trax ATVs	Tillers	Aug. 1984	700,000 sq. ft.	60,000 power equipment products 85,000 ATVs	600	\$380 million
	Honda North Carolina Manufacturing (NCM) produces numerous power equipment products including snow blowers, string trimmers, mini-tillers, and water pumps. North Carolina Manufacturing began production of lawn mowers in 1984 as the third Honda manufacturing plant in America. In 2023, the plant began to transition from production of power equipment products to Honda's all-terrain vehicles (ATVs). NCM began production of lawn mowers in 1984 as the third Honda manufacturing plant in America. Over the years, North Carolina Manufacturing has also produced a wide variety of general-purpose engines, generators, and personal watercraft. NCM earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.							
	Honda Aircraft Company, LLC Greensboro, North Carolina	HondaJet Elite II		Oct. 2012	760,000 sq. ft.	80-100 aircraft	About 900	\$280 million
	Honda Aircraft Company (HACI) was founded in August 2006, and is responsible for the research, development, sales, marketing and manufacturing of the HondaJet Elite II, the world's most advanced light jet. HondaJet is built exclusively at the company's global headquarters in Greensboro, NC and was the most delivered aircraft in its category for the fifth consecutive year. In 2021, HACI opened a new 83,100 square-foot facility to house a new wing assembly process for the HondaJet Elite, representing an additional investment of \$24.3 million. HACI began production of the HondaJet Elite II featuring a host of key advancements in performance and comfort. With an expanded range of 1,547 nm, the Elite II now extends HondaJet's reach to more destinations while maintaining its position as the most fuel-efficient aircraft in its class. HACI earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.							
	Honda Aero, Inc. Burlington, North Carolina	HF120 jet engines		Oct. 2012	132,000 sq. ft.	500 engines	90	\$64 million
	Honda Aero (HAI) produces the GE Honda Aero Engines HF120 turbofan engine, a 2000-lb thrust-class turbofan engine used for light business jets. Designed to provide longer time between overhauls, the HF120 is the most powerful and most fuel-efficient business jet engine in its class. HAI also serves as the official maintenance, repair and overhaul (MRO) facility for HF120 customers and received MRO certification from the FAA in 2016. The facility received the FAA production certification in 2015, the first company in 23 years to earn this certification to build a jet engine in America. HAI earned the 2022 U.S. Environmental Protection Agency ENERGY STAR Certification.							

*Note: Honda and Acura products are made using domestic and globally sourced parts.

North America R&D/Engineering

U.S. R&D Operations

Honda established its first research and development operation in the U.S. in 1975 to conduct market research. Today, Honda conducts the research, design and development of new technologies and products in the U.S., including Honda and Acura automobiles, Honda power equipment, Honda powersports products, and HondaJet. Honda currently operates 23 R&D facilities in the U.S.

Operation	Location	Began
R&D Business Unit	Torrance, California	1975
<i>Responsibilities:</i> Market and technology research for Honda and Acura vehicles. The R&D Business Unit, now part of American Honda, is responsible for user experience research for Honda and Acura automobiles and Honda power sports products.		
Honda Design Studio	Torrance, California	1975
<i>Responsibilities:</i> Market research, concept development and styling design for Honda automobiles and power sports products. The Honda Design Studio, now part of American Honda, is responsible for vehicle styling for Honda automobiles and power sports products. Associates designed the all-new Honda Prologue electric vehicle, and the current Odyssey, Pilot, Passport and Ridgeline.		
Acura Design Studio	Torrance, California	2006
<i>Responsibilities:</i> Market research, concept development and styling design for Acura models. The Acura Design Studio was established within the Torrance campus to focus solely on the Acura automotive brand. Now part of American Honda, the studio is responsible for the design of the all-new Acura ZDX electric vehicle and the current Acura TLX, TLX Type S, RDX, MDX and MDX Type S.		
North American Auto Development Center	Raymond, Ohio	1985
<i>Responsibilities:</i> Product development, automobile and safety research & testing. The North American Auto Development Center (ADC) is responsible for complete product development including the current Honda Pilot, Passport, Odyssey and Ridgeline, and the Acura TLX, TLX Type S, RDX, MDX, and MDX Type S. The Automotive Safety Research Facility within ADC houses one of the world's most sophisticated high-resolution crash test barrier blocks, the world's first pitching crash test simulator, a scale wind tunnel, along with other advanced safety research and testing labs.		
Honda Automotive Labs of Ohio (HALO)	East Liberty, Ohio	2022
<i>Responsibilities:</i> Product development, automobile and safety research & testing. Honda Automotive Labs of Ohio (HALO) is the world's most advanced wind tunnel, with three separate state-of-the art testing functions: aerodynamics, aeroacoustics, and racing — in one location. The wind tunnel facility is used to test Honda and Acura products, as well as the company's race vehicles. The \$124 million HALO facility, located at the independent Transportation Research Center Inc. (TRC) in Central Ohio, opened in March 2022.		
Honda Proving Center of California	Cantil, California	1990
<i>Responsibilities:</i> Testing ground for future Honda and Acura products, including automobiles, motorcycles, side-by-sides and ATVs.		

Operation	Location	Began
Ann Arbor Test Lab	Ann Arbor, Michigan	1975
<i>Responsibilities:</i> Emissions testing, including simulation of road conditions for the powertrain system.		
Denver Test Lab	Denver, Colorado	1980
<i>Responsibilities:</i> High-altitude emissions testing and catalyst aging. <i>Responsibilities:</i> Emissions testing, including simulation of road conditions for the powertrain system.		
Pontiac Office	Pontiac, Michigan	2017
<i>Responsibilities:</i> Development of fuel cell technologies, including a next-generation fuel cell stack, as part of a joint venture with GM.		
Warren Office	Warren, Michigan	2018
<i>Responsibilities:</i> Development of autonomous vehicle technology, working in partnership with GM and Cruise and electric vehicles.		
Fuel Cell System Manufacturing, LLC	Brownstown, Michigan	2020
<i>Responsibilities:</i> Advanced hydrogen fuel cell system production. Established by Honda and General Motors, Fuel Cell System Manufacturing is the auto industry's first manufacturing joint venture to mass produce an advanced hydrogen fuel cell system. The system will be used in future Honda products.		
Powersports Development Office	Raymond, Ohio	1985
<i>Responsibilities:</i> All-terrain vehicle (ATV) and side-by-side research and development. The Powersports Development Office, now part of American Honda, is responsible for the design, development and market testing of Honda all-terrain vehicles and side-by-side products, like the Talon and Pioneer.		
Honda of South Carolina Mfg.	Timmonsville, South Carolina	2012
<i>Responsibilities:</i> All-terrain vehicle (ATV) and side-by-side research and development.		
Solution System Development Office	Haw River, North Carolina	1993
<i>Responsibilities:</i> Power product research, new product development and testing. The Solution System Office, is responsible for the design, development and market testing of various Honda power equipment products, including products built at North Carolina Manufacturing, which is located adjacent to the development center.		
Marine Research Office	Grant-Valkaria, Florida	2009
<i>Responsibilities:</i> Marine product research, development and testing. The Marine Research Office, is dedicated to Honda's marine business, strategically located on the water in Grant-Valkaria, Florida, in the heart of the U.S. marine industry. Associates at the 11,000 square foot facility are responsible for market research, product development and testing of Honda marine products. Most of the Honda outboard engines sold in the U.S. have been tested here.		

North America R&D/Engineering

Aviation R&D

Operation	Location	Began
Honda Aircraft Company, LLC	Greensboro, North Carolina	2006
<i>Responsibilities:</i> The Greensboro, North Carolina facility is the world headquarters for the Honda Aircraft Company, maker of the HondaJet Elite II, including state-of-the-art R&D, production, administration and customer service facilities to develop, produce, market and support the HondaJet.		
Honda Aero, Inc.	Burlington, North Carolina	2004
<i>Responsibilities:</i> Located adjacent to the Burlington-Alamance County regional airport, the Honda Aero facility, which is the global production home of the HF120 light-jet engine, is the official Maintenance Repair and Overhaul facility for the HF120, and features a state-of-the-art test cell, repair and overhaul along with parts warehousing.		

Honda Performance Development

Operation	Location	Began
Headquarters	Santa Clarita, California	1993
<i>Responsibilities:</i> The headquarters of Honda Performance Development, the Santa Clarita facility designs and develops racing engines, and chassis and performance parts as well as providing technical and race support to Honda-powered race teams.		
Indianapolis Development Facility	Brownsburg, Indiana	2013
<i>Responsibilities:</i> The Indianapolis Development Facility is home to HPD's Indiana Tech Center, providing race preparations support, engineering support and racing simulations for IndyCar race teams.		

Honda Innovations Co., Ltd.

In April 2023, Honda established Honda Innovations Co., Ltd. based in Japan, serving as the global head office function for Honda's open innovation activities including the Honda Innovations office in Mountain View, California, established in 2011. Honda Xcelerator, the outward-facing program of Honda Innovations, supports technology and business innovators through open innovation. Through the Honda Xcelerator program, Honda partners with innovators, including startups across all funding stages as well as global brands.

Operation	Location	Began
Honda Innovations Office	Mountain View, California	2011
<i>Responsibilities:</i> Focus areas include Connected Vehicle/Internet of Things (IoT) services, Human Machine Interface, Machine Intelligence/Robotics, Connected Services, Personal Mobility, Sharing Economy, and Industrial Innovation.		

Honda Research Institute USA, Inc.

Established in 2003, Honda Research Institute is North America's advanced research center that provides innovative solutions to complex problems with direct applications to Honda's current and future technology road map.

Operation	Location	Began
Silicon Valley Research Office	San Jose, California	2003
<i>Responsibilities:</i> Advanced technology research.		
The team of scientists and engineers at Honda Research Institute (HRI) create technologies, often generated through a scientific process, and apply them to real situations, addressing more than just abstract principles. HRI follows an open innovation model that establishes partnerships and alliances with academia and the private sector.		
Detroit Research Office	Ann Arbor, Michigan	1996
<i>Responsibilities:</i> The Detroit Research Office of HRI conducts research to improve safety for everyone sharing the road, including wireless communication for in-vehicle navigation systems, telematics system design and development, and connected and automated vehicle system research.		
Ohio Research Office (99P Labs)	Columbus, Ohio	2018
<i>Responsibilities:</i> Advanced research into energy and battery technologies, mobility-related human-computer interaction and software-defined mobility.		
Founded by Honda and The Ohio State University, 99P Labs conducts collaborative research and data-driven innovation toward creating a sustainable mobility future. At 99P Labs, students and interns advance innovations through experiential learning and application of design-thinking, data science, software engineering, and unique approaches to prototype testing.

Associated Region Japan

Major Japan Companies

Company	Established
Honda Motor Co., Ltd.	September 1948
<i>Responsibilities:</i> Product development, manufacture, and sale of automobiles, motorcycles and other transport machinery.	
Honda Finance Co., Ltd.	April 1999
<i>Responsibilities:</i> Financing for the sale and leasing of Honda products.	
Honda Trading Corporation	March 1972
<i>Responsibilities:</i> Import and export of parts for Honda products.	
Honda R&D Co., Ltd.	July 1960
<i>Responsibilities:</i> Technical research and development work for Honda products.	
Honda Engineering Co., Ltd.	September 1970
<i>Responsibilities:</i> Establishment of production systems and production lines and development of machine tools.	
Honda Access Corp.	August 1976
<i>Responsibilities:</i> Develop, manufacture and sales of Honda special accessories for motorcycles and automobiles.	
Honda Mobilityland Corporation	June 2006
Two corporations were merged in June 2006 under Mobilityland Corporation.	
• Suzuka Circuit	1962
• Twin Ring Motegi	1997
<i>Responsibilities:</i> Operation of amusement parks and racing circuits.	
Honda Motorcycle Japan Co., Ltd.	August 2001
<i>Responsibilities:</i> Sales and marketing of motorcycles.	
Honda R&D Sun Co., Ltd.	July 1992
<i>Responsibilities:</i> Manufacturing and sales of engine parts, transportation equipment, and agricultural machinery, and research and development of wheelchairs and equipment for rehabilitation training.	
Honda Power Products Japan Co., Ltd.	October 2017
<i>Responsibilities:</i> Wholesales and after market service of power products.	
Honda Airways Co., Ltd.	March 1964
<i>Responsibilities:</i> Airline company.	

On April 1 2023, Honda combined four regional operations into a newly established Associated Regions. Associated Regions include Japan, Asia/Oceania, South America, Europe, Africa, and the Middle East region.

Honda R&D Co., Ltd.

Company	Established
Design Center	April 2020
<i>Responsibilities:</i> Interior and exterior design of products.	
Solution System Development Center	April 2020
<i>Responsibilities:</i> Research, design and development of power products.	
Innovative Research Excellence	April 2020
<i>Responsibilities:</i> Technical research for the future, including connected, AI, ADAS.	
Innovative Research Excellence, Power Unit & Energy	April 2020
<i>Responsibilities:</i> Research, design and development of engines of automobile, motorcycle, power products and aviation.	
Honda Research Institute Japan Co., Ltd.	January 2003
<i>Responsibilities:</i> Research and development of advanced technologies.	
Honda Racing Corporation	September 1982
<i>Responsibilities:</i> Development, manufacture and management of both Auto and Motorcycle racing.

2013

December	<ul style="list-style-type: none"> • GE Honda Aero Engines' HF120 turbofan jet engine is awarded Part 33 certification from the U.S. Federal Aviation Administration, having accumulated more than 14,000 cycles and 9,000 hours of testing. • The HondaJet receives Type Inspection Authorization from the Federal Aviation Administration (Dec. 20, 2013). • Honda Aircraft Company's customer service facility receives Federal Aviation Administration Part 145 repair station certification. 	May	<ul style="list-style-type: none"> • Honda Aircraft Company announces that its FAA-conforming HondaJet has achieved several key development milestones including aerodynamics/stall testing, function and reliability, environmental performance and structural testing. • Honda Motor Co. announces its intentions to participate in the FIA Formula One (F1) World Championship from the 2015 season under a joint project with McLaren. • Acura announces the establishment of the new \$45 million Performance Manufacturing Center in Marysville, Ohio, where 100 associates will produce the next-generation Acura NSX supercar.
November	<ul style="list-style-type: none"> • The Honda FCX Concept is unveiled at the 2013 Los Angeles International Auto Show, expressing one potential styling direction for the next-generation Honda fuel cell electric vehicle launching in the U.S. and Japan in 2015. • The Honda Vezel (HR-V) small SUV is unveiled in Japan, offering the dynamic qualities of an SUV, the elegance of a coupe and the functionality of a minivan. • Honda announces that it has developed a new gasoline direct-injected VTEC Turbo engine within its Earth Dreams Technology™ powertrain series, delivering high levels of driving joy and fuel economy. With displacement sizes of 2.0, 1.5 and 1.0 liters, the new engine series is best suited to small- and mid-sized vehicles. • Honda introduces the more compact, lighter UNI-CUB personal mobility device in Japan, taking another step forward to verify the business feasibility of the technology through a fee-based commercial leasing program. • The first large-scale U.S. clinical study of Honda's Walking Assist Device is undertaken at the Rehabilitation Institute of Chicago. 	March	<ul style="list-style-type: none"> • The 2013 Honda Civic Sedan and Coupe, equipped with the next-gen ACE body structure, are among first compact cars to receive an IIHS Top SAFETY Pick+ safety rating, including a GOOD rating in the Institute's stringent new small overlap frontal collision test. • Honda Motorcycle & Scooter India Pvt., Ltd. announce plans to create new India R&D center for the development of cutting-edge technology for its customers in the region. • Honda Motor Co. begins operations at a new 300,000-unit motorcycle plant in Penang, Malaysia, using advanced environmental technologies including a 5,000 kWh/year solar array, high-efficiency coating technology, and a low-VOC emissions electro-deposition process.
September	<ul style="list-style-type: none"> • Honda de Mexico marks the beginning of construction on a new \$470 million transmission plant in Celaya, Mexico, which will begin producing continuously variable transmissions in 2015 with an initial annual capacity of 350,000 units. • Honda Motor Co. earns the highest disclosure scores among all Japanese companies and is named one of the world's most advanced companies in the Carbon Disclosure Project's Global 500 Climate Change Report 2013. 	February	<ul style="list-style-type: none"> • American Honda expands leasing of the Fit EV to customers in select Northeastern U.S. markets, including New York, New Jersey, Connecticut, Maryland and Massachusetts. • Honda Automobile Thailand announces plans to build a new automobile plant with investment of 44.6 billion yen, initial employment of 1,200 associates and annual capacity of 12,000 units, with operations scheduled to begin in 2015.
July	<ul style="list-style-type: none"> • Production begins at the Saitama Factory's 250,000-unit Yorii plant, utilizing state-of-the-art "green factory" technologies and processes. 	January	<ul style="list-style-type: none"> • Acura debuts 2014 Acura MDX Prototype and next-generation NSX Concept with full interior design concept at 2013 North American International Auto Show. • Honda of America Mfg., Inc. announces it will invest \$23 million, hire 50 new associates and construct a 95,000-square-foot expansion to accommodate production build the all-new 2014 Accord Hybrid at the Marysville, Ohio, auto plant beginning in fall 2013.
June	<ul style="list-style-type: none"> • Honda and General Motors announce an agreement to co-develop a next-generation fuel cell system and hydrogen storage technologies, aiming for the 2020 timeframe. 		

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2012

- The 2013 Honda Accord Sedan, equipped with the ACE IITM body structure, is one of first midsize sedans to earn a TOP SAFETY PICK+ rating from the Insurance Institute for Highway Safety.
- Twenty-five years after the start of U.S. auto exports, the Marysville, Ohio auto plant builds the 1-millionth Honda automobile for export.
- The 2013 Honda Accord and Fit earn Car and Driver 10Best awards, the seventh consecutive year for the Fit and an unprecedented 27th 10Best award for the Accord.
- American Honda launches freshened 2013 Civic Sedan and Coupe.
- Honda R&D Americas opens new Advanced Design Studio in downtown Los Angeles, relocating from its former Pasadena, Calif. home.
- Acura debuts all-new 2014 RLX performance-luxury sedan at the Los Angeles Auto Show.
- Honda marks 30 years of auto production in the U.S., by announcing new \$200 million investment in Ohio transmission and engine plants.
- Honda Aircraft begins HondaJet production.
- American Honda begins sales of eighth-generation Accord, in both Sedan and Coupe variants.
- On August 20, the Marysville, Ohio, auto plant begins mass production of the ninth-generation 2013 Accord, as the plant approaches 30 years of manufacturing Honda automobiles in America.
- American Honda begins leasing the Fit EV all-electric commuter vehicle to customers in Southern California and Oregon.
- Honda of South Carolina (HSC) produces its 2-millionth engine since the start of production at its Timmonsville, S.C., plant in 1998.
- Honda announces expansion plans: Honda Manufacturing of Indiana **to** invest \$40 million and hire 300 associates to boost capacity by 50,000 vehicles per year and add production of Civic Hybrid in 2013; Honda Manufacturing of Alabama to invest \$115 million and hire 50 associates to increase production by 40,000 vehicles per year and add production of Acura MDX in 2013.
- American Honda announces new HondaLink™ in-vehicle connectivity system, featuring the first OEM application of Aha® radio, to debut on the 2013 Accord and Crosstour models.
- Honda becomes the world's first mobility company to disclose third-party validated estimates of all greenhouse gas (GHG) emissions.
- **Acura begins sales of its new ILX sedan, the new gateway vehicle for the Acura brand and the first Acura product with an available hybrid powertrain.**
- The compact and innovative Honda UNI-CUB, featuring the world's first omni-directional driving wheel system is unveiled in Japan.
- **Honda Manufacturing of Indiana (HMIN) begins production of the Acura ILX and ILX Hybrid sedans on the same line as the Civic Sedan and Civic Natural Gas. The ILX is the first Acura to be produced in Indiana and the first Honda or Acura hybrid vehicle to be produced in North America.**
- American Honda launches its first-ever "Green Dealer" program for U.S. Honda and Acura dealers.
- The Acura RLX Concept is unveiled at the New York International Auto Show, where it is announced that Acura's new flagship sedan will feature the first application of Acura Sport Hybrid SH-AWD®.
- American Honda announces plans to apply new visibility-enhancing technologies on its automobiles, including rearview cameras, to be applied to over 97% of all model year 2013 Honda models, Expanded View Driver's Mirror and LaneWatch™ blind-stop display, which will debut on the 2013 Accord.
- Honda Motor Co. and the Japan Metals & Chemicals Co., Ltd. jointly announce the establishment of the world's first process to extract rare earth metals from various used Honda parts in an actual mass-production process.
- **The East Liberty, Ohio, auto plant begins production of the Acura RDX luxury crossover SUV.**
- Honda introduces 2013 Accord Coupe Concept at the North American International Auto Show, announcing plans to apply new 'powertrain technology and new safety features, including Lane Departure Warning and Forward Collision Warning, to the ninth generation Accord lineup.
- Acura introduces the NSX Concept and ILX Concept, along with a prototype 2013 RDX at the North American International Auto Show.

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2011

- **Honda debuts the 2013 Fit EV and 2012 Honda CR-V at the 2011 Los Angeles Auto Show.**
- **The 2012 Civic Natural Gas named Green Car of the Year at the 2011 Los Angeles Auto Show.**
- **American Honda completes the installation of an 800-cell Honda CIGS solar array at Honda Performance Development in Santa Clarita, Calif.**
- **Honda Manufacturing of Alabama marks its 10th anniversary of production, announcing plans to invest \$84 million and add 140 new jobs to increase production capacity by 40,000 units to 340,000 vehicles and V6 engines per year in 2013.**
- **Honda's East Liberty Auto Plant produces its 4-millionth vehicle, a 2011 Honda CR-V.**
- **American Honda launches 2012 Civic Natural Gas, the fourth generation natural gas-powered Civic, expanding its U.S. retail network to 200 Honda dealers in 36 states.**
- **Honda certified its tenth and eleventh facilities in North America to LEED green-building standards, the most of any automaker in the region. They are Honda Engineering North America's Anna, Ohio facility and the new Markham, Ontario headquarters of Honda Canada.**
- **Honda earns the highest score among all Japanese companies in the Carbon Disclosure Project's 2011 "Carbon Disclosure Leadership Index" (CLDI), which rates the world's 500 largest companies on their strategies and corporate governance to address climate change and the reduce greenhouse gas emissions.**
- **Honda announces plans to build its eighth auto plant in North America, a new \$800 million, 200,000-unit factory in Celaya, Guanajuato, Mexico, slated to begin production of Honda subcompact vehicles in 2014.**
- **Honda achieves its goal of less than 1 percent waste sent to landfills for all manufacturing plants in North America with ten of 14 plants in operating with absolutely zero waste to landfills.**
- **American Honda as a corporation earned the top score in the 2011 J.D. Power Initial Quality Survey, including a best-ever result for the Honda brand, the top-ranked non-luxury brand in 2011, an overall third-place finish for Acura, along with seven of eleven segment-leading models, a Platinum Award for the company's Greensburg, Ind. plant, and a Silver Award for its East Liberty, Ohio plant.**
- **Honda introduces "Blue Skies for our Children" environmental logo and slogan, along with new environmental vision, which calls for realizing "the Joy and Freedom of Mobility" and "a Sustainable Society where People Can Enjoy Life."**
- **Having achieved its 2010 goals for the reduction of product CO₂ emissions, Honda announces new global CO₂ reduction goals, including a 30 percent reduction in CO₂ from its automobile, motorcycle and power equipment products, compared to the 2000 baseline, by 2020.**
- **American Honda debuts the all-new 2012 Civic lineup for the U.S., including a Coupe, Sedan, Si Coupe and Sedan, Hybrid and natural gas-powered Civic Natural Gas at the New York International Auto Show.**
- **The first FAA-conforming HondaJet reaches its maximum operating altitude of 43,000 feet and a maximum speed of 425KTAS (489 mph) at 30,000 feet during flight testing in Greensboro, N.C.**
- **Guangqi Honda introduces the Li Nian S1 sedan, the first mass-produced model of Guangqi Honda's original automotive brand, Li Nian, the first original brand established by an automobile joint venture in China.**
- **Honda Motor Co. president Takanobu Ito, appearing at the 2011 Shanghai motor show, announces plans to sell three new hybrid models in China — the Insight, to be sold by Dongfeng Honda; and the Fit Hybrid and CR-Z, to be sold by Guangqi Honda. Mr. Ito also announces Honda's intentions to produce all three hybrid models in China and to begin testing of Honda EV technology with the city of Guangzhou.**
- **Honda Automobile (Thailand) Co., Ltd. introduces the Honda BRIO small car for the Thailand market. With a starting price of 399,900 baht, the model is expected to raise the bar for eco-cars in terms of packaging, design, comfort and fuel efficiency.**
- **The 2011 Odyssey becomes the first minivan to earn both a "Top Safety Pick" rating from the IIHS and a five-star Overall Vehicle Score from the NHTSA under new, more stringent crash safety-ratings protocols.**
- **Honda debuts the 2012 Civic Si and Sedan concept vehicles at the North American International Auto Show in Detroit.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2010

- **Honda Transmission Mfg. begins \$70 million, 200,000-square-foot expansion, including the addition of a third assembly line, along with an additional \$25 million in upgrades to improve plant flexibility.**
- **Honda Aircraft Company, Inc. completes the first flight of an FAA-conforming HondaJet, Dec. 20 at 3:31 p.m. EST in Greensboro, N.C.**
- Honda begins lease sales of the EV-neo electric scooter to customers in Japan.
- Honda begins demonstration tests of next-generation, electrically powered personal mobility products with the Saitama and Kumamoto prefectures as the next step in its Honda Electric Mobility Network initiative.
- **Honda introduces the Fit EV Concept electric vehicle and Honda plug-in hybrid vehicle platform at the 2010 Los Angeles Auto Show.**
- **The 2011 Accord is the first automobile to earn a five-star rating for Overall Vehicle Score and each of three combined ratings categories — frontal, side and rollover — under the NHTSA's modified New Car Assessment (NCAP) crash safety-rating program for the 2011 model year.**
- The CR-Z sport hybrid coupe is named Japan Car of the Year for 2010-2011.
- **Honda is named "America's Greenest Automaker" for the fifth consecutive time by the Union of Concerned Scientists.**
- The Hybrid Jazz makes its world debut at the Paris Motor Show.
- **Honda Manufacturing of Alabama, Inc., begins production of the fourth generation, U.S.-designed and developed Honda Odyssey minivan Sept. 1 (U.S. on-sale date of Sept. 30). Two days later, the plant celebrates production of its 2-millionth automobile (and V6 engine), a 2011 Honda Pilot.**
- **All-new Honda CR-Z sport hybrid coupe introduced in the U.S. and Canada.**
- An all-new transmission plant at the Hamamatsu Factory, Honda's global "leader plant" for advanced transmission production, begins manufacturing operations.
- Honda Soltec begins sales in Japan of new 120W and 130W residential-use solar cell modules, each achieving an 11.6 percent conversion rate, the highest among CIGS-based solar cells being sold in Japan.
- **The Marysville Auto Plant produces its 10-millionth automobile, an Accord Sedan, on July 20.**
- **The Anna Engine Plant, Honda's largest automobile engine plant, celebrates 25 years of engine production in Ohio, July 21.**
- **Honda Power Equipment surpasses 30 million products shipped to domestic dealers and distributors since it began offering engines, tillers and generators to U.S. customers in 1972.**
- Honda subsidiary Honda Motorcycle and Scooter India announces plans to build a new 60,000-unit plant in Rajasthan, India, as it expands production at its existing plant in Haryana from 1.25 to 1.6 million units.
- **Honda of America Mfg. begins operations at its new Marysville parts consolidation center, supporting the efficient delivery of parts to the Marysville Auto Plant while reducing fuel consumption and CO₂ emissions from parts shipments.**
- **Honda earns the No. 1 spot on the American Council for an Energy-Efficient Economy (ACEEE) "Greenest Vehicles of 2010" list for the tenth straight year.**
- **Honda Performance Development (HPD) begins deliveries of modified 1.5-liter Fit engines for competition in the SCCA Formula F series, the entry level of open-wheel racing in America.**
- The all-new Honda CR-Z (Compact Renaissance-Zero) sport hybrid coupe is launched in Japan.
- **American Honda debuts the U.S. production version of the CR-Z two-seat sport hybrid car at the North American International Auto Show.**
- **Honda R&D Americas, Inc. begins operation of next-generation solar-powered hydrogen station prototype in Torrance, Calif. The new, more compact system eliminates the compressor function while providing enough hydrogen, via an 8-hour fill, to accommodate daily commuting in a fuel cell electric vehicle.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2009

- **American Honda earns the highest fleet-average fuel economy among all U.S. automotive marketing groups as determined by the U.S. EPA in its MY2008 report on U.S. fuel economy trends.**
- Honda R&D Asia Pacific Co. establishes new R&D center in Bangkok, Thailand, for the development of products and technologies that support the unique needs of customers in Honda's Asia/Oceania region.
- **Honda Manufacturing of Alabama begins production of passenger cars (Accord V6 Sedans) after eight years of light truck production.**
- Takanobu Ito becomes the seventh president & CEO of Honda Motor Co.
- The new Ogawa Engine Plant in Japan began Phase 1 production activity including casting and machining processes and supply of engine components for auto plants in Japan and other regions.
- **Honda commemorates 50 years of operations in America, marking the incorporation of American Honda Motor Co., Inc., June 11, 1959.**
- **Marysville, Ohio, motorcycle plant ceases production after 26 years, as global production of certain large motorcycles is consolidated at Honda's new factory in Kumamoto, Japan.**
- **Honda Manufacturing of Indiana begins production of the natural gas-powered Civic GX sedan in Greensburg, Ind., alongside the gasoline-powered Civic Sedan.**
- The Honda Insight becomes Japan's best-selling vehicle in May, the first hybrid car to earn the distinction.
- The FCX Clarity fuel cell electric vehicle is named 2009 World Green Car by journalists from Asia, Europe and North America.
- **The 2009 Acura TL is the first automotive nameplate to earn both a top government crash safety rating and a "Top Safety Pick" crash safety rating from the IIHS for every vehicle in its line-up.**
- **American Honda begins sales of the new Insight as the most affordable hybrid car in America.**
- Honda R&D Co. (Japan) in conjunction with Advanced Telecommunications Research Institute International (ATR) and Shimadzu Corporation introduce Brain Machine Interface (BMI) technology which enables control of a robot by human thought alone.
- Honda and GS Yuasa establish a joint venture called Blue Energy Co., Ltd., for the development, sales and production of advanced lithium-ion batteries for hybrid vehicles.
- **Production of the Honda Ridgeline truck begins at Honda Manufacturing of Alabama, making it the exclusive production source for the Honda Pilot, Odyssey and Ridgeline light trucks.**
- Honda Motor Co. announces plans for the establishment of a new R&D facility in Chiba Prefecture, Japan, to work toward the establishment of bio-ethanol production technology.
- **Honda produces its 20-millionth automobile in North America as cumulative production of engines in North America exceeds 18.4 million units and production of transmissions tops 13 million units.**
- **American Honda debuts the radically styled 2010 Honda Fury, a chopper-style custom bike designed by Honda R&D Americas, at the New York International Motorcycle Show.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2008

- Honda Motor Co. unveils new Walking Assist Device with Bodyweight Support system, developed in part from its research into the dynamics of human motion that led to creation of the ASIMO humanoid robot.
- **Honda Power Equipment Mfg. produces its 20-millionth product since the start of operations in August 1984.**
- **Honda Manufacturing of Indiana begins production of Civic sedans in its new \$550 million auto plant in Greensburg, Ind.**
- Cumulative global production of Honda motorcycles reaches 200 million units.
- Honda Soltec Co. begins sales in Japan of Honda-developed thin-film solar cells.
- Thai Honda achieves cumulative production of 10 million units since production began in 1987.
- **Acura launches the 2009 TL Sedan. It is the third generation of TL designed, developed and manufactured in the U.S.**
- **Honda of Canada Mfg. begins production of 4-cylinder engines at new \$154 million automobile engine plant in Alliston, Ontario.**
- Honda introduces POLAR III third-generation pedestrian crash test dummy with the aim of reducing lower back and upper leg injuries common in vehicle-pedestrian collisions.
- **American Honda launches redesigned 2009 Honda Fit.**
- **Acura announces plans to compete in the LMP1 class of the 2009 American Le Mans race series.**
- **Honda Transmission Mfg. of America in Russells Point, Ohio, produces its 10-millionth transmission since the start of U.S. transmission manufacturing in 1997.**
- Production of Honda motorcycles in Vietnam reaches 5 million units.
- Honda begins mass production of all-new FCX Clarity fuel cell vehicle (FCX) in Japan and introduces first five U.S. customers for the new vehicle.
- **American Honda fully deploys the first automaker-operated fleet of more fuel-efficient Auto-Max® railcars.**
- Cumulative automobile production in Brazil reaches 500,000 units since the start of production in 1997.
- Honda Sael Cars India introduces the Civic Hybrid as India's first gas-electric hybrid automobile.
- **American Honda introduces second-generation Pilot that was designed, developed and engineered in the U.S. by Honda R&D Americas and is produced exclusively by Honda Manufacturing of Alabama.**
- **Honda Aircraft Company begins European sales of HondaJet, including the announcement of plans for an exclusive regional sales and service network in the U.K., Germany and Spain.**
- Cumulative global production of the Cub series motorcycle reaches 60 million units.
- Honda opens a new motorcycle plant at the Kumamoto Factory in Japan as Honda's global lead plant for motorcycle production.
- **Honda Aircraft Company expands sales of HondaJet throughout North America by beginning sales in Canada and Mexico.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2007

- **Honda's annual auto production in the U.S. exceeds 1 million units for the first time ever in 2007, as total North American auto production reaches a new all-time record of 1.432 million units.**
- Honda UK sells more than 100,000 Honda vehicles for the first time, in 2007.
- **The hydrogen-powered FCX Clarity makes its U.S. debut at the Los Angeles Auto Show as Honda announces plans to begin leasing the next-generation fuel cell vehicle in summer 2008.**
- **Operation of the fourth-generation hydrogen Home Energy Station begins at Honda R&D America's Torrance, Calif., headquarters.**
- **Honda celebrates 25 years of building automobiles in America.**
- **Honda Aero breaks ground on its new headquarters and jet engine plant in Burlington, N.C.**
- Honda Soltec opens new solar cell production plant in Kumamoto, Japan.
- **Honda of South Carolina Mfg. produces its 2-millionth all-terrain vehicle (ATV).**
- **American Honda launches the eighth-generation Accord.**
- **Honda Aircraft Company breaks ground on new \$100 million U.S. headquarters and R&D facility in Greensboro, N.C.**
- Honda introduces a more advanced Variable Cylinder Management™ (VCM™) cylinder deactivation technology.
- **Honda R&D America's opens its new Acura Design Studio in Torrance, Calif., assuming a central role in the research and styling design of future Acura production models.**
- **Honda's Anna, Ohio, engine plant produces its 15-millionth engine since the start of production in 1985.**
- **Honda is named America's "Greenest Automaker" in 2007 for the fourth consecutive time by the Union of Concerned Scientists.**
- **American Honda and Climate Energy, LLC begin retail sales of the freewatt™ micro-combined heat and power (MCHP) co-generation device in the northeastern U.S.**
- **Acura undertakes first factory racing program with entry into the American Le Mans endurance sports car racing series in the LMP2 class with a 3.4-liter V8 engine supplied by Honda Performance Development (HPD).**
- **Acura RDX named Canadian Utility Vehicle of the Year.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2006

- **Honda R&D Americas opens new Advanced Design Studio in Pasadena, Calif.**
- Honda Soltec Co., Ltd. established to oversee production and sales of Honda-developed CIGS solar panels in Japan.
- Honda Motor Co. announces plans to build new engine plant in Japan (in Ogawa, Saitama prefecture).
- **Honda Manufacturing of Alabama celebrates 5th anniversary and reaches one-million unit automobile production milestone.**
- Honda announces plans to begin production of motorcycles in Peru.
- **Honda Aircraft Company begins U.S. sales of HondaJet at NBAA in Orlando, Fla.**
- **Acura launches new RDX sport-utility vehicle with Acura's first-ever turbocharged engine.**
- **Honda of Canada Mfg. celebrates 20th anniversary and 4-millionth unit production milestones.**
- Honda and Research Institute of Innovative Technology for the Earth (RITE) announce breakthrough "Honda-RITE" ethanol production process.
- **American Honda fulfills October 2003 "Safety for Everyone" commitment to apply a core suite of advanced safety features to all U.S. Honda and Acura models.**
- **Honda announces plans to commercialize HondaJet at EAA AirVenture in Oshkosh, Wis.**
- **Honda earns 100th open-wheel race victory in North America.**
- **First U.S.-made Acura (TL Sedan) exported to China.**
- Honda begins motorcycle production in Argentina.
- Honda announces development of plant-based biofabric for use in automotive interiors.
- Global sales of Honda Power Products reaches 70 million units.
- **Honda announces "2010 Vision" for North American automobile operations including the construction of a new U.S. auto plant and a new Canadian engine plant, expansion of engine and transmission production in Ohio and Georgia, and the addition of a new, more affordable hybrid car.**
- Honda Motor Co. announces plan to build a new auto plant in Yorii, Japan, to advance the flexibility and efficiency of Honda manufacturing operations worldwide.
- **Honda begins producing automatic transmissions in Tallapoosa, Ga., as part of Honda's broader North American powertrain strategy.**
- **2006 Civic and Ridgeline capture Canadian Car and Truck of the Year awards.**
- **Honda Power Equipment shipped its 20-millionth power product to U.S. dealers.**
- **2006 Civic and Ridgeline sweep North American Car and Truck of the Year awards.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2005

- **Honda Ridgeline truck named 2006 Motor Trend magazine Truck of the Year.**
- **2006 Civic becomes first compact car to earn a “Top Safety Pick-Gold” rating from the Insurance Institute for Highway Safety (IIHS).**
- New ASIMO robot debuts with dramatically improved running capability and enhanced ability to act in sync with people.
- Honda Motor Co. announces plans to begin mass production in 2007 of Honda-developed thin film solar cell.
- Honda Super Cub production reaches 50-million-unit milestone since its 1958 debut.
- **Honda Civic named 2006 Motor Trend magazine Car of the Year.**
- **Honda R&D Americas introduces Home Energy Station III, the third-generation of its experimental hydrogen refueling device developed in partnership with Plug Power, Inc.**
- Honda announces plans to establish R&D operations in Thailand with the creation of Honda R&D Asia Pacific, Ltd., a subsidiary of Honda R&D Co., Ltd.
- Honda announces plans to establish transmission manufacturing operations in China with the creation of Honda Auto Parts Manufacturing Co., Ltd.
- Honda introduces ASV-3 advanced safety vehicle equipped with Inter-Vehicle communications technology.
- **HondaJet makes its worldwide public debut, July 29 at the Experimental Aircraft Association (EAA) Air Venture in Oshkosh, Wis.**
- Honda Motor (China) Investment Co. (HMCI) announces plans to launch the Acura brand in China with the introduction of the Acura RL in spring 2006, to be marketed through a dedicated Acura dealer network.
- **Honda leases 2005 FCX to world’s first individual customer for a hydrogen-powered fuel cell vehicle.**
- **Honda announces commitment to include U.S. government crash test “star ratings” on the window labels of all 2006 Honda and Acura vehicles, a first for any automaker.**
- Honda Automobile (China) Co. (CHAC) begins export of the Jazz compact passenger car to Europe. CHAC is the first auto plant in China dedicated to export production.
- **The 2006 Honda Ridgeline becomes the first 4-door pickup to earn the NHTSA’s highest crash test rating for frontal and side impacts.**
- Cumulative worldwide sales of Honda hybrid vehicles reaches 100,000 units.
- **Honda introduces Phill™ natural gas home refueling appliance in conjunction with Fuelmaker Corp. to help promote sales of cleaner-burning CNG vehicles like the Honda Civic GX.**
- **American Honda and Disneyland® Resort form 10-year strategic business alliance.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2004

- Honda reveals technologies for next-generation ASIMO humanoid robot, including the ability to run and process information more quickly in real-world environments.
- **Honda introduces V6 Accord Hybrid in the U.S. as Honda's third hybrid model.**
- All new Legend wins the Japan Car of the Year award for 2004-2005 and Most Advanced Technology Award.
- **Honda leases two 2005 FCX fuel cell vehicles to the state of New York, the first customer for a fuel cell vehicle in the Northeastern U.S.**
- **GE Honda Aero Engines LLC is established to pursue the launch of Honda's HF118 turbofan engine in the light business jet market.**
- **Honda of America Mfg. celebrates its 25th anniversary.**
- Guangzhou Honda begins production of the Fit for the China domestic market.
- **Honda claims its first Indy Racing League (IRL) manufacturers' title (Honda-powered drivers win 14 of 16 races for the season).**
- Honda develops a scooter powered by its original Honda FC Stack, capable of starting in sub-freezing temperatures.
- **Honda establishes a new U.S. subsidiary, Honda Aero, Inc., to focus on the aviation engine business in the U.S. Also, Honda establishes the Wako Nishi R&D Center in Japan, dedicated to the research and development of aviation engines.**
- **The 2005 Honda FCX powered by Honda's original FC Stack is certified for commercial use by both the U.S. EPA and California Air Resources Board.**
- **Buddy Rice earns Honda's first victory in the Indianapolis 500®.**
- **Honda Manufacturing of Alabama begins production on its second assembly line, doubling light truck and V6 engine production capacity to 300,000 units per year.**
- Honda establishes a new subsidiary, Honda Motor RUS LLC, in Russia to strengthen its local motorcycle, automobile and power product sales operations.
- Honda and General Electric Co. announce the formation of a strategic alliance to produce a new turbofan jet engine for light business jets.
- Honda Motor (China) Investment Co., Inc., responsible for developing Honda's overall business strategy in China, is established.

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2003

- **The HondaJet, new experimental compact business jet equipped with Honda-developed HF118 jet engines, completes initial flight tests in Greensboro, N.C.**
- **Honda of South Carolina Mfg. produces its 1-millionth all-terrain vehicle (ATV).**
- **Honda's cumulative auto production in the U.S. reaches 10 million units.**
- **American Honda Motor announces "Safety for Everyone" commitment to apply advanced safety technologies such as the Advanced Compatibility Engineering (ACE) body structure and side curtain airbags to the full range of Honda and Acura products over the next several years.**
- **Honda R&D Americas debuts an all-new Automotive Safety Research Facility in Ohio, featuring advanced crash safety testing laboratories.**
- **Honda announces the development of the Honda FC Stack next-generation fuel cell stack that delivers high performance, yet operates at temperatures as low as -20°C (-4°F).**
- **Honda develops world's first electronically controlled fuel-injection system (PGM-FI) for a 4-stroke 50cc scooter.**
- **Honda introduces new Advanced Compatibility Engineering™ (ACE™) body structure that both enhances self-protection and reduces aggressivity in vehicle-to-vehicle collisions.**
- **Honda becomes the world's first automaker to supply a fuel cell vehicle to a private corporation, Iwatani International Corporation.**
- **Honda debuts Variable Cylinder Management™ (VCM™) V6 3.0-liter i-VTEC engine.**
- **Civic Hybrid becomes the first-ever hybrid vehicle to earn certification as an Advanced Technology Partial Zero-Emissions Vehicle (AT-PZEV) from the California Air Resources Board (CARB).**
- **Takeo Fukui becomes sixth president & CEO of Honda Motor Co.**
- **Honda develops the world's first Collision Mitigation Brake System (CMBS).**
- **Honda establishes 6th region in China as part of global structure that also includes regional operations in North America, South America, Europe/Middle East/Africa, Asia/Oceania and Japan.**
- **Honda joins Indy Racing League (IRL) open wheel racing series for 2003 season.**
- **Honda Power Equipment Mfg. in North Carolina announces \$30 million expansion to increase general-purpose engine production to 1.5 million units.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2002

- **American Honda introduces the Honda Element light truck to its U.S. vehicle lineup.**
- Honda Fit finishes 2002 as best-selling car in Japan, a first for Honda. Fit also goes on sale in Europe as “Jazz” model.
- Honda’s China auto plant announces plan to increase production capacity to 240,000 units in 2004, with a corresponding increase in engine production.
- **Honda South Carolina Mfg. begins production of Honda AquaTrax personal watercraft (PWC).**
- Honda’s FCX fuel cell vehicle delivered to first customers in Japan and U.S. simultaneously.
- Japan version of all-new, sixth-generation Accord earns the 2002-03 Japan Car of the Year award.
- **U.S. production of Honda and Acura automobiles reaches 20-year milestone.**
- Honda introduces a new rapid- and wide-deploying side curtain air bag technology that protects both front and rear passengers — the all-new 2003 Accord was the first model to receive the new technology.
- **Honda FCX becomes first fuel cell vehicle in the world to earn certification from U.S. EPA and the state of California (CARB).**
- Honda introduces AquaTrax, company’s first personal watercraft.
- Honda celebrates 25th anniversary of listing on the New York Stock Exchange (NYSE) as ASIMO humanoid robot rings opening bell for trading.
- Honda begins rental of ASIMO humanoid robots in Japan.
- U.K. auto plant begins export of Civic hatchback to North America.
- Honda establishes motorcycle R&D center in China.

2001

- Honda introduces first mass-market gas-electric hybrid car with the introduction of the Civic Hybrid.
- **Honda Manufacturing of Alabama, Honda’s third U.S. automobile plant, begins production with Odyssey minivan.**
- Fit earns the 2001-2002 Japan Car of the Year award.
- New joint venture company in China, Sundiro Honda Motorcycle starts production of jointly developed M-LIVING motorcycle.
- **North American auto production reaches 10 million-unit milestone.**
- Gold Wing GL1800 named “Motorcycle of the Year” by Motorcyclist magazine, and is first production motorcycle certified to meet California’s strict 2008 emission standard.
- Honda production operations in Thailand produce 10-millionth product — including automobiles, motorcycles and power products.
- Honda’s second U.K. auto plant begins production.
- **Honda R&D Americas opens first solar-powered hydrogen production and fueling station in Southern California.**
- Honda launches Fit on all-new global small car platform — using all-new i-DSI (Dual & Sequential Ignition) engine.
- Honda announces development of a new-generation 2-liter class diesel engine for the European market.
- **Honda Civic GX natural gas vehicle becomes first car certified as an Advanced Technology Partial Zero Emission Vehicle (AT-PZEV).**
- **2001 Acura MDX named North American Truck of the Year.**

* Government star ratings are part of the National Highway Traffic Safety Administration’s (NHTSA’s) New Car Assessment Program (www.safercar.gov). Model tested with standard side-impact air bags (SAB’s).

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

2000

- Honda introduces new humanoid robot, ASIMO.
- **2001 Civic Coupe is one of the first two automobiles and the first affordable small car to achieve 5-star crash safety ratings for both frontal and side impact from the NHTSA*.**
- **Acura introduces MDX as the brand's first U.S. designed and developed SUV.**
- Civic line-up earns the 2000-01 Japan Car of the Year award.
- Honda earns 500th World Grand Prix motorcycle race.
- **Honda earns 6th consecutive driver's championship on CART auto racing series.**
- **Honda begins testing FCX-V3 fuel cell vehicle through California Fuel Cell Partnership.**
- **Cumulative production of Accord in the U.S. reaches 5 million units, and Civic reaches 2 million units.**
- **Honda Power Equipment Mfg. \$16 million expansion triples general purpose engine capacity from 300,000 units to 1 million units annually.**
- **2001 Civic is introduced as first gasoline car to achieve Ultra-Low Emissions Vehicle (ULEV) emissions performance in all 50 states.**
- Honda introduces Polar II pedestrian crash test dummy with injury data measurement capability.
- Honda establishes fifth region in South America as part of global structure that includes regional operations in North America, Europe/Middle East/Africa, Asia/Oceania and Japan.
- Honda opens world's first indoor car-to-car directional crash test safety facility in Tochigi, Japan.
- Honda begins third era of Formula One® Grand Prix auto racing participation.

1999

- **Honda Insight becomes first gas-electric hybrid car sold in the U.S., and 2000 Accord is the first gasoline car to be marketed as a Super Ultra-Low Emissions Vehicle (SULEV), four years ahead of regulatory requirements.**
- Honda announces global powertrain production system calling for the integration of engine assembly operations closer to vehicle assembly.
- **Honda and GM establish powertrain cross-supply agreement in December in which GM will use a Honda V6 Ultra Low Emission engine and transmission and Isuzu will supply Honda with diesel engines for the European market.**
- Honda announces innovation of auto plants in Japan to the flexible "New Manufacturing System" that will be installed in all of Honda's major global auto plants by fall 2002.
- Honda announces new company-wide year 2005 targets for fuel-consumption and exhaust gas emissions for Honda motorcycles, automobiles and power products.
- Honda fuel cell prototype vehicles FCX-V1 and FCX-V2 are introduced.
- **American Honda passed the \$10 billion mark in exports of automobiles, motorcycles, power products and key components from North America.**
- **Honda begins Intelligent Community Vehicle System (ICVS) called "Intellishare" at the University of California, Riverside using Honda's EVPLUS electric vehicles.**
- Honda announces next generation of 4-cylinder i-VTEC engines that offer new level of high fuel economy, low emissions and outstanding performance.
- Honda begins auto production in China with Accord sedan.

* Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.safercar.gov). Model tested with standard side-impact air bags (SAB's).

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1998

- American Honda passed the 1-million mark in annual sales of Honda and Acura cars and light trucks for the first time in company history.
- **The Honda Civic GX natural gas vehicle goes into production in Ohio with the cleanest internal combustion engine ever certified by the U.S. EPA.**
- **Honda of South Carolina Mfg. begins production of ATVs at new \$30 million plant in Timmonsville, S.C.**
- Civic 5-door, developed by Honda R&D Europe and built in the U.K., is introduced.
- Auto production begins in India.
- Hiroyuki Yoshino becomes fifth president & CEO of Honda Motor Co.
- Honda Motor Co. celebrates 50th anniversary.
- **American Honda exports its 500,000th North American-built car.**
- Honda Interceptor named "Motorcycle of the Year" by Motorcyclist magazine.
- **New second line at Honda of Canada Mfg. begins production of Honda's first full-size Odyssey minivan.**

1997

- Auto production begins in Brazil and Turkey.
- Motorcycle production begins in Vietnam.
- Cumulative global motorcycle production reaches 100 million units.
- Cumulative global power equipment production reaches 30 million units.
- Ultra-small 360-degree inclinable 4-stroke power equipment engine announced.
- Honda announces research project including two new turbofan jet engine prototypes for small aircraft and an experimental jet plane.
- Twin Ring Motegi motorsports complex begins operations.
- All-new 1998 Accord introduced with unique designs for the U.S. and Japan, but using the same flexible platform.
- **Civic and Accord Low Emission Vehicle (LEV) sales begin in all 50 states.**
- **1998 Accord is first gasoline car to meet CARB Ultra Low Emission Vehicle (ULEV) standards in California.**
- **Honda begins leasing the EV PLUS electric vehicle to customers in California.**
- J.D. Power and Associates awards its Platinum Prize for quality to the Marysville, Ohio, Auto Plant and Gold Prize for quality to the Sayama Plant in Japan.
- The Acura RL is the first automobile introduced with an in-dash, satellite-linked navigation system.
- **Honda's first crossover-SUV, the CR-V, goes on sale.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1996

- Honda introduces first prototype humanoid robot, called P3.
- Honda Motor Co.'s Honda Dream solar car breaks speed and time records at the World Solar Challenge in Australia.
- **Honda captures all three major awards on the 1996 PPG IndyCar World Series racing circuit — top manufacturer, top rookie and top driver.**
- **Honda's Marysville, Ohio, motorcycle plant produces its 1-millionth vehicle (Gold Wing Aspencade).**
- **Honda Transmission Mfg. of America begins production of automobile transmissions in Russells Point, Ohio.**
- **Honda announces an accelerated "Strategy for the Americas" with a 50 percent expansion in U.S. automobile engine and automatic transmission production.**
- New Honda plant in Thailand begins production with City Sedan designed exclusively for local Asian markets.
- Honda introduces Intelligent Community Vehicle System (ICVS) in Japan in which consumers share limited number of vehicles in conjunction with mass transit.
- **The Acura Division introduces the CL series, the first U.S.-designed, engineered and manufactured model offered by a luxury import nameplate.**

1995

- **Automobile Magazine names the Honda Civic the 1996 Automobile of the Year.**
- The Honda Civic named 1995-96 Japan Car of the Year award.
- **Honda de Mexico begins production of automobiles for the Mexican market.**
- **The U.S. EPA releases 1996 fuel economy rankings with four Honda models in the top 10.**
- **Honda Civic becomes first gasoline-powered vehicle to meet CARB's Low Emission Vehicle (LEV) standard.**
- Cumulative global auto production reaches 30 million units.
- **Honda produces its 5-millionth car in North America.**
- **American Honda sells its 10-millionth Honda brand car.**
- Honda introduces Multi Matic continuously variable automatic transmission (CVT).
- Cumulative global production of Civic reaches 10 million units.
- **Honda becomes the first manufacturer to develop a production-based gasoline engine certified as meeting Ultra Low Emission Vehicle (ULEV) exhaust levels.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1994

- **American Honda exports its 100,000th U.S.-made vehicle for the year, making the Honda Accord the No. 1 export model from North America in 1994.**
- Honda introduces the 1995 Odyssey, its first minivan.
- **Acura sells its 1-millionth vehicle in the U.S.**
- Honda Motor Co. establishes four-region global organization structure that gives greater autonomy and decision-making responsibility for four major regional operations: Americas, Europe/Middle East/Africa, Asia/Oceania and Japan. In a related move, Honda announces new “Automobile Strategy for the Americas.”
- **Honda competes in the IndyCar World Series (later CART) for the first time.**
- **Honda Power Equipment Mfg. assembles its 1-millionth lawn mower since the start of operations in August 1984.**
- **Cumulative sales of Honda and Acura automobiles in the U.S. reach 10 million units.**

1993

- Honda’s solar car Dream wins the World Solar Challenge 1993 in Australia.
- **Honda R&D North America (HRA) unveils a \$25 million expansion of its research and development facilities in Ohio and opens new research and development center for power equipment products in Swepsonville, N.C.**
- **Honda of America Mfg. produces its 2-millionth engine at the Anna Engine Plant in Ohio.**
- **Honda of America Mfg. produces its 3-millionth car since beginning U.S. auto production in 1982.**
- **American Honda announces plans to participate in IndyCar World Series.**

1992

- **American Honda exports its 100,000th U.S.-made automobile.**
- **American Honda Education Corp. breaks ground for Eagle Rock School, an innovative high school and professional development center in Colorado.**
- Honda of U.K. Mfg. begins automobile production.
- Honda announces its first equity investment in China-based motorcycle production. Motorcycles had been produced through four technical collaboration agreements.
- Honda produces its 20-millionth Super Cub motorcycle at its Kumamoto factory in Japan.
- **Honda of America Mfg. builds its 2-millionth automobile in Ohio.**
- Honda Motor Co. produces 20-millionth automobile in Japan.

1991

- The Honda Civic named 1991-92 Japan Car of the Year award.
- Honda introduces the new VTEC-E engine which combines Honda’s Variable Valve Timing System (VTEC) with lean-burn technology.
- **Honda Canada sells its 1-millionth car, a Canadian-made Civic 3-door.**
- Soichiro Honda, who founded Honda Motor Co. in 1948, dies at the age of 84.
- **Honda of America Mfg. Motorcycle Plant in Marysville, Ohio, produces the 500,000th vehicle in its history — a Gold Wing Aspencade motorcycle.**
- **Honda of America Mfg. produces its 1-millionth engine.**
- Honda Motor Co. begins selling Chrysler Jeep models in Japan (sales continue through 1998).
- **NSX supercar debuts in America and is the first Acura model to wear the A-badge.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1990

- Soichiro Honda is awarded a FIA Gold Medal in Paris, France.
- **American Honda becomes first automaker with plans to offer standard driver and passenger airbags in all (Honda and Acura) models by the 1994 model year.**
- **Acura begins sales of NSX sports car, the world's first mass-produced aluminum-bodied automobile.**
- **American Honda moves Power Equipment Division from California to Atlanta, Georgia area.**
- **Honda R&D America opens new California Proving Center in Mojave Desert.**
- Nobuhiko Kawamoto becomes fourth president & CEO of Honda Motor Co.
- Honda Engineering Europe, Ltd. is established in the U.K. to coordinate Honda engineering activities in Europe.

1989

- **Honda Accord becomes the top-selling auto in the U.S. for the first time.**
- **Honda of America Mfg. begins production at second U.S. auto plant in East Liberty, Ohio, and produced its 1-millionth automobile in Marysville, Ohio (a Civic Sedan).**
- Soichiro Honda inducted into the Automotive Hall of Fame in the U.S.
- Honda of U.K. Mfg. begins producing engines in its Swindon, U.K. plant.
- Honda Motor Europe Ltd. is established in U.K. to serve as Honda's European headquarters.
- **The East Liberty plant is the first auto plant in America to use more environmentally responsible waterborne basecoat paint.**

1988

- Honda-powered Formula One® cars win the Constructor's Championship, winning 15 of the 16 races.
- **Honda Engineering North America, Inc. is incorporated.**
- Honda announces development of high performance VTEC auto engine with variable valve timing.
- Honda reaches the 15 million mark in total car production in Japan.
- **Honda products rank 1-2-3 in the 1988 Motor Trend Import Car of the Year.**
- **Honda begins first export of U.S.-built automobiles to Japan with the Accord Coupe.**
- **American Honda opens first motorcycle Rider Education Center in Colton, Calif.**

1987

- Honda reaches 50-million mark in total motorcycle production in Japan — the first manufacturer in the world to do so.
- **Honda announces a five-part strategy to become an autonomous motor vehicle company in the U.S. including expansion of R&D and production engineering, a second U.S. auto plant, increased local parts sourcing, expansion of the engine plant and increase of auto exports from the U.S.**
- **Air bags introduced in the Acura Legend — for the first time in a Honda product.**
- **American Honda exports first U.S.-made vehicle, an Accord Sedan exported to Taiwan.**
- **Honda de Mexico begins producing motorcycles and auto parts.**
- **Acura becomes the top-selling import luxury brand in America.**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1986

- **Honda produces first auto engine at Anna, Ohio, engine plant (1.5-liter Civic).**
- Honda-powered Formula One® cars win the Constructor's Championship for the first time (through 1991 for six consecutive years).
- **J.D. Power Customer Satisfaction Index rates Acura No. 1 for the first time (through 1989 for four consecutive years).**
- **Honda of America Mfg. begins production on second assembly line at Marysville Auto Plant.**
- **Honda of Canada Mfg. begins production in Alliston, Ontario (with Accord).**
- **Acura launched in the U.S. March 27 with sales of Legend and Integra 3- and 5-door models.**
- **Honda CRX-HF is the first mass-produced car to exceed 50 mpg EPA fuel-economy rating.**

1985

- Honda de Mexico established.
- The Honda Accord/Vigor series receive the 1985-86 Japan Car of the Year award.
- **Honda of America Mfg. begins production of motorcycle engines at new plant in Anna, Ohio, in July.**

1984

- **Honda Power Equipment Mfg. starts production of lawn mowers in Swepsonville, N.C.**
- **American Honda Motor Co. establishes American Honda Foundation for philanthropic contributions.**
- **Honda Research of America, Inc. (now Honda R&D Americas, Inc.) established in Torrance, Calif.**
- **American Honda announces plan for luxury automobile division (later named Acura).**

1983

- Tadashi Kume becomes third president & CEO of Honda Motor Co.
- Honda re-enters Formula One® Grand Prix racing.
- Honda Motor Co. and the Rover Group sign agreement for joint design and development of a luxury passenger car.
- The Honda Civic/Ballade series named 1983-84 Japan Car of the Year award.
- **Honda CRX introduced as the first Honda automobile designed primarily for the U.S. market.**

1982

- **Honda of America Mfg. begins auto production in Ohio November 1 with the Accord.**
- **Car and Driver magazine names the Honda Accord to its list of the Ten Best Cars for the first time.**

1981

- **Honda of America Mfg. begins production of the Gold Wing.**
- **American Honda Finance Corp. is established.**

1980

- **Honda announces plans to construct a U.S. auto plant in Ohio.**

1979

- **Honda of America Mfg. starts motorcycle production in Marysville, Ohio, with the CR250M Elsinore.**
- Honda introduces the Accord Sedan and Prelude Coupe.
- Honda introduces its first lawn mower, the HR-21.

1978

- **Honda of America Mfg., Inc. is established in Ohio.**
- Cumulative global auto production reaches 5 million units.

1977

- **Civic CVCC ranks first in the first-ever fuel economy ranking by the U.S. Environmental Protection Agency (EPA).**

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1976

- **Accord becomes one of the longest-running and most successful nameplates sold in the U.S.**

1975

- **Honda R&D Co. establishes a liaison office in Torrance, Calif. (later becomes Honda R&D Americas).**

1974

- **The Civic CVCC (Compound Vortex Controlled Combustion) engine is the first engine to comply with the 1970 Clean Air Act without a catalytic converter.**
- **Gold Wing GL1000 is introduced in the U.S.**
- Honda is the first Japanese automaker to issue consolidated financial statements.

1973

- Honda Motor Co. founder and president Soichiro Honda retires along with co-founder and executive vice president Takeo Fujisawa. Kiyoshi Kawashima becomes second president of Honda Motor Co.
- **American Honda begins sales of Civic.**

1972

- **Honda Trading America Corp. established for the export of products from the U.S. to Japan.**

1970

- Honda announces CVCC (Compound Vortex Controlled Combustion) engine technology.
- **American Honda begins sales of outboard marine engines with the BF45 and BF75 4-stroke engines.**
- **American Honda begins sales of N600 automobile in continental U.S.**
- Honda Engineering Co., Ltd. established in Japan — production engineering company.

1969-1960

1969

- **American Honda begins sales of the N600 automobile in Hawaii.**
- **Canadian Honda Motor Ltd. (now Honda Canada, Inc.) established in Toronto, Canada.**
- Honda begins automobile production in Taiwan and Malaysia through technical collaboration.
- **American Honda launches its first large motorcycle, the Dream CB750 Four.**

1968

- **American Honda sells 1-millionth motorcycle in the U.S.**
- Honda withdraws from Formula One® racing to concentrate on production of commercial cars and development of low-emission technologies.

1967

- Production of automobiles starts at Suzuka factory.
- Honda begins motorcycle production in Thailand.

1966

- Honda F-2 car establishes a record of 11 consecutive victories.

1965

- Honda Formula One® car wins first Grand Prix race in Mexican Grand Prix.

1964

- Honda begins participating in Formula One® Grand Prix racing.

1963

- **American Honda's "You Meet the Nicest People on a Honda" advertising campaign helps revolutionize the American motorcycle industry.**
- **American Honda moves its headquarters to Gardena, Calif.**
- Honda's first overseas plant Honda Benelux in Belgium starts production of "mopeds."
- Honda issues EDR (European Depositary Receipts) in Europe.
- Honda markets first automobile S500 and lightweight truck T360 in Japan.

1962

- **Honda issues ADRs (American Depositary Receipts) in the U.S.**
- Motorcycle production begins in Taiwan through technical collaboration.
- **American Honda launches first power equipment product, the F190 mini-tiller.**

1961

- Honda racing team wins Britain's Isle of Man TT Races in 125cc and 250cc classes.

1960

- Research and Development division is re-established as a separate company — Honda R&D Co.

Chronology

Note: North American highlights in bold. Honda and Acura products built in the U.S. are manufactured using domestic and globally sourced parts.

1959-1946

1959	• American Honda Motor Co., Inc. established as Honda’s first overseas subsidiary June 11. The Honda 50 (Super Cub), Dream and Benly motorcycles are the first products.
1958	• Honda launches Super Cub motorcycle in Japan, helping make Honda the sales leader.
1955	• Honda leads Japan in motorcycle production volume.
1954	• Honda declares intention to race in Isle of Man Tourist Trophy race in the U.K. (eventually participating for the first time in 1959).
1952	• Honda’s first general-purpose engine (Type H) is produced.
1949	• Honda introduces first original motorcycle — 2-stroke Dream D-type.
1948	• Soichiro Honda incorporates Honda Technical Research Institute and renames it Honda Motor Co., capitalized at 1 million yen.
1946	• Soichiro Honda establishes Honda Technical Research Institute in Hamamatsu, Shizuoka Prefecture, where he develops and produces internal combustion engines and machine tools.
